

urban planning & design for the SDGs

Part III Project work Kick-off exercise
AG2805/2017

What to do?

- 17 groups (one per SDG)
- Connect the SDG to urban planning and design / urban development
- Write a short report on key suggestions of how urban planning and design can contribute to the SDGs
- Write the report in the Canvas Discussion Forum

think global act local

- Is this SDG a problem in your home town?
 - If so, in what way does it show? Can you see it, feel it, measure it?
 - What do you think are root causes of the problem?
 - How could you deal with this problem through local action?
 - Could you deal with this problem through action at other scales (regional, national, international) or at other places?
 - What can urban planning and design do?

think global act local

- If not visible as a problem in your hometown, where do you think this SDG manifests as a problem?
 - In what way does it manifest? Can you observe it, measure it?
 - What are the root causes of the problem?
 - Is anything in your hometown part of the problem?
 - How could you deal with this problem through local action (in the places where it is visible)?
 - Could you deal with this problem through action at other scales (regional, national, international) or at other places?
 - What can urban planning and design do (and where)?
