

# Part 2

## Academic language: concise, clear and correct

# Writing your project report for DA150X

Susanna Lyne, KTH Language and Communication

21 March 2022

- We write to communicate
- We write because we have something to say
- We write because we need to display our knowledge

Therefore, academic writing needs to be concise, precise and stylistically appropriate

# New!

## A Guide to Scientific Writing in English

<https://www.kth.se/en/larande/sprak/kurs/eng/writing-guide/style-and-register>

(Link in Canvas published soon)

- Pages under construction
- academic style, sentence structure and principles for text flow
- Common errors and FAQs

# Four important features of good academic *style*

Conciseness

Clarity and precision

Register – correct level of formality

Correctness

---

# Academic texts are *concise*

- They express complex ideas in as few words as possible
  - The author must carefully decide *which information to include* and what parts to leave out.
  - The words chosen carry as much meaning as possible (this ties in with *style* and *clarity* as well)
-

# Conciseness: say what you need to say in as few words as possible

 The website **has made available many of the things you can use for making a decision on** the best dentist.

 The website **presents a list of criteria for determining** the best dentist.

De-personalise!

# Same principle in Swedish

*Undersökningens syfte är först och främst att undersöka hur barn och ungdomar talar till vardags och om de i så fall brukar använda slang.*

*Denna rapport undersöker barns och ungdomars vardagliga användning av slang.*

Breakouts 5  
mins:  
Worksheet  
Task A

# Conciseness and style: Avoid writing *you*

When **you** use the phone **you** may find that the connection is slower than it should be.

In most cases, the user will *experience* that the connection is slower than usual.

In most cases, the user experience might be inferior.

Here, there is no person "present" in the sentence, but the *user experience* (an abstract, technical key word) is in focus.

# Same principle in Swedish

När **man** använder telefonen kan det hända att  
**man** upptäcker att uppkopplingen inte är så snabb  
som den borde vara.

I de flesta fall upptäcker användaren / uppringaren att  
uppkopplingen är långsammare än vanligt.

Concise  
sentences are  
often more  
*precise!*

männan användarupplevelsen kan påverkas

Here, there is no person "present" in the sentence, but the *user experience* (an abstract, technical key word) is in focus.

# Academic text is *precise*: details are important

Quite a small portion of the...

→ Only 10.5 % of the...

School pupils

→ fifth- to eighth-grade pupils

Some municipalities in Sweden

→ Four municipalities in Sweden: Kiruna, Hudiksvall,  
Laxå and Varberg.

*A mobile device -- a smartphone -- a Samsung Galaxy  
S4?*

## Find a more precise word

*do*  
*make*

Tests were done  
We did  
experiments  
Calculations were  
made

Tests were performed  
We conducted a set of experiments  
*X was calculated*

*get*

We got good  
results

*We obtained (achieved)  
significant/clear results*

*give*

We gave the  
participants a  
headset each.

*We provided (equipped) each  
participant with a headset*

## ...and some Swedish equivalents

*göra*

Experiment  
gjordes

*genomfördes, utfördes*

*få*

Vi fick bra resultat

Testerna genererade  
tydliga resultat

*Ta (ta fram, ta upp)*

Materialet som togs  
fram har...  
Det som tas upp i det  
här avsnittet är...

Det utvalda materialet  
har...  
*De problem som  
behandlas*

# Academic style

Write to inform, not to impress!

## Style: Phrasal verbs → single verbs

What could be improved in this sentence?

According to some biologists, coming up with clear proof of the decreasing number of frogs has been difficult.

According to some biologists, **offering** clear proof of the decreasing number of frogs has been difficult. (more formal)

## Style: Can you replace the phrasal verb with a more formal synonym in these sentences?

Scientists are **investigating** innovative ways to combat

The purpose of this paper is to **determine** what is lacking in the current understanding of corrosion.

Rice and aquatic products **constitute** major part of the diet of the people in Vietnam.

Suppliers want to **remove** of this time-consuming process

6 minutes in  
Breakouts.

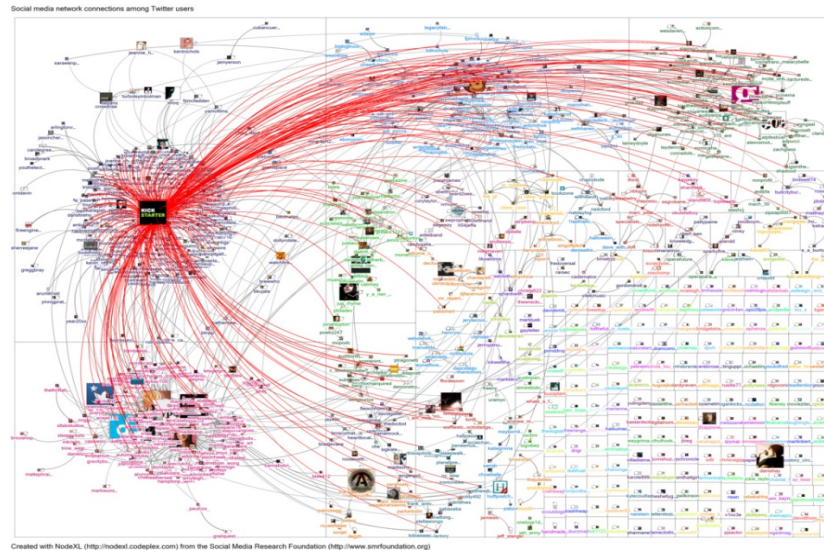

Worksheet  
Task B

# Style/precision: expressing “a lot of”

*“This  
application  
displays  
a lot of data”*

***A lot of***

***Large amounts of data***

***A great number of projects***

~~***A huge amount of***~~

~~***Enormous amount of***~~

***Several tests***

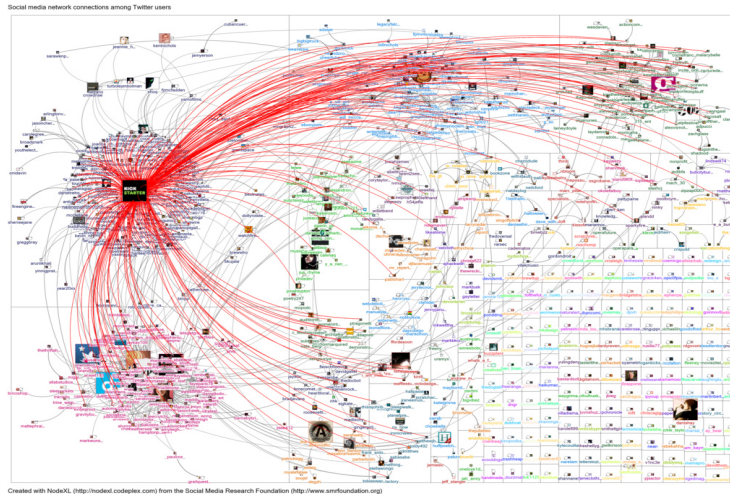

***Many studies***

~~***Many researches***~~

***Much research***

---

# Style/precision: mycket, massor av, många

***”Denna  
applikation  
genererar massor  
av data”***

***Massor av***

Mycket stora mängder data

~~Väldigt~~ stora mängder data

Fler än 200 körningar

En stor del av den befintliga forskningen

Ett flertal experiment

---

# Style: Write out contracted forms as two words

- *don't* → *do not*
- *haven't* → *have not*
- *wasn't* → *was not*
- *it's* → *it is*

What is the difference between **its** and **it's**?

---

# Some common errors - getting it correct

- Word order
- Subject-verb agreement
- Possessives – where does the apostrophe go?
- Numbers in English and Swedish

Flickr.com / creative commons image by Tim Lumley

# Word order is often more flexible in Swedish

- a. För att få en inblick i ämnet och kunna dra slutsatser om vad som kan tänkas ske rent mikrobiologiskt **har** en litteraturstudie **utförts**.
- b. **En litteraturstudie har utförts** för att få en inblick i ämnet.

*In English, word order is more fixed.*

## Word order 1: *which sentence is best?*

- a. Jones has, in a joint project with three European universities, reported interesting results...

- b. In a joint project with three European universities, Jones has reported interesting results...

## Word order 2: *which sentence is best?*

- a. The conclusion was drawn that X was the  
most suitable method for testing Y's binding  
abilities to different Zs.
- b. The conclusion that X was the most suitable  
method for testing Y's binding abilities to  
different Zs was drawn.

# A fixed word order = *clearer sentence structure* *agreement made easier!*

Doubts about the feasibility of the solution *has/have been* raised.

Avoid the problem by moving the verb

Doubts *have been raised* about the feasibility of the solution.

# Get the *apostrophe* right

- A dataset
  - Two datasets (plural form, no apostrophe)
  - *The experiment's outcome (= the outcome of one experiment)*
  - *The experiments' outcome (= the outcome of two or more experiments)*
-

## Get it correct: quotation marks

”

”

ninety-nine ninety-nine

“

”

sixty-six ninety-nine

# Get it correct: Writing numerals

135 400,5

135,400.5

# In sum...

Readers want texts that are logical and readable.

Your text needs to be

Concise: Say it in as few words as possible

Precise: Choose words that convey as much information as possible

Correct: Choose the appropriate *style*  
Get spelling, punctuation, and grammar right

See you in the seminars!
